

FACING FENTANYL

Stay Informed. Stay Protected.

Fentanyl is a highly addictive & potent synthetic opioid analgesic up to

100x
MORE POTENT
THAN
MORPHINE

YOU CAN'T
SEE, SMELL OR TASTE
FENTANYL

Fentanyl is often
ABUSED &
commonly mixed
with heroin or
cocaine in
POWDER,
PILL OR
LIQUID FORM

The CDC confirms that Fentanyl is the **DEADLIEST DRUG IN AMERICA**

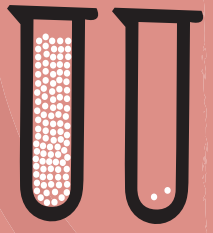

There is a
540%
INCREASE
in Fentanyl
overdose
deaths since
2016

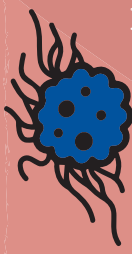

Fentanyl can be
ABSORBED
THROUGH THE
SKIN
putting coroners,
first responders,
police & morticians
AT RISK

FENTANYL IS SO POTENT that a dose the size of a **GRAIN OF SAND** can be deadly

HEROIN FENTANYL

FENTANYL WAS INVENTED
IN 1960
for treating severe pain due to illnesses such as cancer or as a surgical anesthetic.

OUR GLOVES ARE DISPOSABLE. THE PEOPLE THEY PROTECT ARE NOT®

Sempermed is committed to keeping your hands safe and protected. As a hand protection company, it is important for us to educate our customers on the risks they may face on the job, such as Fentanyl exposure. To help minimize the risk, Sempermed offers seven nitrile exam gloves that provide protection against harmful fentanyl contact. Chose from SemperShield® standard cuff, SemperShield® extended cuff, SemperForce®, SemperCare®, StarMed® Ultra, StarMed® Black or TenderTouch®.
