

MAXIMIZING Your Knowledge

Glove the Planet® is Sempermed USA Inc.'s commitment to reducing our environmental impact. By thinking ahead and consuming less we're able to do more to minimize our global footprint with every step we take. Our ethos of sustainability drives innovative production and distribution practices that lead to greater efficiencies, resulting in less waste, reduced emissions, and a healthier planet for future generations. To learn more, visit GlovethePlanet.com.

That's how we
GLOVE *the* **PLANET**®

EACH OF OUR MATERIALS IMPACT THE PLANET DIFFERENTLY, AND WE BELIEVE THAT EDUCATING OUR CUSTOMERS ON THOSE DIFFERENCES WILL HELP YOU MAKE CHOICES YOU CAN FEEL GOOD ABOUT.

LATEX

Biodegradable Because natural rubber latex gloves are manufactured using a natural compound, they are more biodegradable than gloves manufactured with synthetic polymers.

Carbon-Neutral Thermal Energy After latex can no longer be harvested from rubber trees, the wood can be burned to produce 100% of the thermal energy used in the production of disposable latex gloves. This method is carbon-neutral and has no negative impact on the environment.

Recycled Packaging Inner boxes are made with 80% recycled materials and outer cartons are made with 90% recycled materials.

NITRILE

Advanced Material Our nitrile gloves are manufactured with state of the art technology and strong compounds, so they're just as durable as a standard nitrile glove, but with less material, reducing the negative impact on the environment.

Efficient Packaging Most of our nitrile gloves are packaged in boxes of 200, 250 or 300 rather than 100 gloves. This packaging method reduces paper use and results in less waste.

Recycled Packaging Inner boxes are made with 80% recycled materials and outer cartons are made with 90% recycled materials.

VINYL

Vinyl gloves Manufactured from a thermoplastic polymer vinyl gloves (PVC) are the least effective form of barrier protection when compared with Nitrile or Latex Gloves. Vinyl gloves are also less biodegradable.

Recycled Packaging (For most products) Inner boxes are made with 80% recycled materials and outer cartons are made with 90% recycled materials.
